

Economic solutions for all frame sizes

SEFAR® 2 – Stretching clamps

We provide with SEFAR® 2 a strong and economic stretching system. SEFAR® 2 makes its mark as a user-oriented, lightweight and rugged clamp for stretching synthetic mesh on all frame sizes.

SEFAR® 2 / 150		Jaw width 150 mm Stroke length 70 mm Total length 475 mm Height (Overall) 175 mm Weight 5.2 kg	SEFAR® 2 clamps has a surprisingly good price/performance ratio. With this light and sturdy clamps synthetic mesh can be stretched on all frame sizes.
SEFAR® 2 / 250		Jaw width 250 mm Stroke length 70 mm Total length 475 mm Height (Overall) 175 mm Weight 5.7 kg	Product features <ul style="list-style-type: none"> ▪ Modular single or dual-circuit pneumatic system ▪ Progressive build-up of the jaw pressure ▪ Quickly adaptable to different frame sizes ▪ Clamping jaws having widths of 150 and 250 mm ▪ Stroke length of 70 or 140 mm ▪ Max. mesh tension of 40 N/cm ▪ Easy opening and closing of the clamping jaws ▪ Robust construction
SEFAR® 2 L / 150		Jaw width 150 mm Stroke length 140 mm Total length 615 mm Height (Overall) 175 mm Weight 6.3 kg	Customer benefits
SEFAR® 2 L / 250		Jaw width 250 mm Stroke length 140 mm Total length 615 mm Height (Overall) 175 mm Weight 7.2 kg	<ul style="list-style-type: none"> ▪ Economic ▪ Time saving adaption to different frame sizes ▪ No slippage of the mesh from the clamps ▪ Simple and practical operation ▪ No restriction on frame sizes ▪ Constant tension values obtainable ▪ Pre-tensioning of the frame guarantees uniform tension values ▪ Minimum maintenance

No frame size restriction thanks to SEFAR® 2
